

# Feedback received from you

- Role of civil society in implementation, demand creation and accountability/advocacy
- Principles to include equity and human rights
- Not just picking one intervention, integration into larger continuum of care
- Contextualization of the proposed initiative – start by acknowledging achievements and existing mechanisms
- Stronger emphasis on Option 1 (enhanced coordination) a starting point, with Option 2 (targeted financing initiative) building on it
- Design initiative so that it a) enhances domestic spending for RMNCH, b) leverages innovative approaches, private sector lessons
- Link to FP initiative, as a „wedge“ into the broader continuum of care

# Guiding principles

- **Simplicity:** Keep design simple to enable rapid start up
- **Complementarity** : Build on **and expand**, not substitute for, other mechanisms
- **Leverage:** **Catalytic investments triggering and better aligning** domestic and bilateral donor funding at the country level
- **Country leadership:** Adhere to Global Strategy focus on country-driven program design and implementation, aligned with national plans
- **Mutual accountability** : Drive transparency and answerability relating to resources and results
- **Equity:** **Ensuring the poorest and most vulnerable women and girls have the same access to quality services and supplies**
- **Strategic focus:** On high impact/low coverage interventions and related strengthening of health systems in high burden countries – **while ensuring integration into broader CoC**
- **Innovation:** in financing, systems and service delivery, including integration, and addressing quality and demand side barriers
- **Time-bound nature:** Five years initially; continuation based on assessment of effectiveness, functionality of hosting and continued need

# Recommendations for Board consideration

- The PMNCH Board acknowledges the efforts and achievements to augment financing for RMNCH in the context of the Global Strategy and beyond.
- It highlights the importance of further improving the **coordination and effectiveness of existing funding efforts and mechanisms, and applauds recent achievements in this area**
- **However, the Board agrees with the TT report that improved coordination alone will be insufficient** to achieve rate of scale-up required to reach Global Strategy goals
- The Board therefore endorses the TT recommendation to
  - **Establish or expand an existing mechanism within an existing organization** based on the **principles** proposed by the TT
  - Focus the facility on (co-) **financing scale up of selected high impact interventions and related HSS across the CoC in subset of high priority LICs;**
  - Consider **FP as specific window** within the proposed RMNCH financing facility
- The Board mandates the EC (or group charged by EC), to collaboratively **explore hosting arrangements with institutions** identified. In doing so, the EC should cooperate closely with the FP initiative to ensure consistency of approaches.
- Request **endorsement of hosting options no later than July 2012.**
