PMNCH Board Meeting Item 6: Delivering on Country Commitments

From strategy to action: Progress to date

Collaborative Advocacy Action Plans (“CAAPs”) harness power of partnership

- PMNCH country partners will work together to support governments in implementing existing global, regional and domestic commitments on MNCH, SRHR and AWB, as well as mobilizing new AWB pledges, through the development of a collaborative partner-led advocacy action plans (“CAAP”);
- CAAPs will be developed in line with the principles and approach described in the Board-approved country advocacy and accountability Strategy;
- In 2023, PMNCH will support the development of CAAPs in 10 countries: Bangladesh, Ethiopia, Kenya, Liberia, Niger, Nigeria, Mali, Malawi, Sierra Leone, Senegal, South Africa, Tanzania and Zambia;
- By the end of 2024, PMNCH will support action for implementation in 30 countries, reflecting the aims of the PMNCH 2021-2025 Results Framework.

Step-by-step development of CAAPs

Step 1

Identify country focal points/lead partners in priority countries to coordinate CAAP efforts

Status: Country lead partners identified in 7 of 10 countries: Kenya, Liberia, Malawi, Nigeria, Zambia, Senegal, and South Africa

Step 2

Identify and assess functional status of WCAH-focused, country-led MSPs to support CAAP development

Status: Underway

Step 3

Map existing WCAH national commitments, and analyze their implementation status

Status: Underway, supported by global tools (Digital commitments compendium, guided by the PMNCH Knowledge & Evidence Working Group); inclusive PMNCH Digital Advocacy Hubs (involving all constituencies), guided by the Governance and Ethics Committee

Step 4

Develop and implement CAAPs

Status: Lead partners currently developing CAAP proposals, based on common template

Step 5

CAAP reporting by country lead partner

Status: To be undertaken periodically, guided by the PMNCH Accountability Working Group

Overview: CAAP development

South Africa

Lead Partner: Clinton Health Access Initiative South Africa

MSP: South African Civil Society for Women's Children and Adolescent Health

CAAP Development Progress: Mapping of commitments made towards SDGs, FP2030, ICPD@25, GEF, ENAP, EPMM, GFF underway

High-level engagement with Minister of Health and parliamentarians ongoing to socialize these efforts and secure their support and contributions towards this process

Nigeria

Lead Partner: Africa Health Budget Network

MSP: Federal MOH led national RMNCAH+N platform in Nigeria (with support from local and international partners)

CAAP Development Progress: Contracting process finalized

High-level engagement with Minister of Health and parliamentarians ongoing to socialize these efforts and secure their support and contributions towards this process

Overview: CAAP development (cont.)

Malawi

Senegal

Zambia

Lead Partner: Amref Health Africa

CAAP Development Progress: Kick off-call with Amref Africa and 3 Country Offices organized; contracting process underway

High-level engagement with Ministers of Health and Speakers ongoing to socialize these efforts and secure their support and contributions towards this process

Overview: CAAP development (cont.)

Liberia

Lead Partner: Public Health Institute of Liberia

MSP: TBD (Learnings from Global Fund supported CCM and GFF supported MSP)

CAAP Development Process: Proposal to be finalized by June 2023

High-level engagement with Minister of Health ongoing to socialize these efforts and secure their support and contributions towards this process

Kenya

Lead Partner: HENNET

MSP: Revitalise RMNCAH MSP (first developed through GFF support) - TBC

CAAP Development Process: Proposal to be finalized by June 2023

High-level engagement with Minister of Health and Speaker ongoing to socialize these efforts and secure their support and contributions towards this process

New tool: WCAH Commitment Compendium

- The PMNCH commitment compendium brings together commitments on MNCH, SRHR, and AWB. It aims to track and support implementation of existing WCAH commitments, and be used for the mobilization of new AWB commitments.
- What it will include:
 - ✓ Information about existing country-level WCAH commitments pledged through regional or global processes
 - ✓ Recommended indicators to measure progress of these commitments
 - ✓ Existing accountability mechanisms to monitor, review progress and make decisions for action/remedies.
- Expected format
 - An online database embedded within the PMNCH Accountability Portal
 - Information categorized by WHO regions and countries
 - Searchable/easily filtered by thematic areas/type of commitment
 - Easy to navigate/user-friendly
 - Allows for cross-country comparison

Linked to additional resources, guidance, discussion forums and relevant networks via the via the Accountability Portal and Digital Hubs

PMNCH Digital Advocacy Hubs will support the CAAPs

A Hub will be created for each CAAP country

Hubs will enable country partners to:

- Connect with each other
- Foster inclusive participation among all stakeholders, including youth groups and private sector
- Enable access to curated tools and resources

Expected benefits of Hubs

- Continual sharing of experiences
- Collaborative planning
- Joint mobilization, at speed and scale
- Transparent monitoring of CAAP outcomes and results

Discussion Questions

- **Overall:** Opportunities/gaps with the CAAP approach? What does success look like?
- **Knowledge tools:** How can the PMNCH WCAH commitment compendium and Accountability Portal best support partners in accessing and using evidence and information to scale up their capacity for accountability and advocacy?
- **Digital Hubs:** Success factors and considerations for implementation?
- **Linking local to global, and global to local:** How to maximize PMNCH advocacy capacity and reach?
