

2025 highlights

- ✓ **Parliamentary engagement.** Proposed RMNCAH+N legislation brought into the spotlight. Supported members of the National Assembly to fast track three proposed bills.
- ✓ **Improving advocacy skills.** Trained 20 community organizations to learn how to advocate for change and have a voice in shaping public policy.
- ✓ **Evidence for action.** Strengthened evidence-based advocacy through development of key messages, budget analysis, and traditional media engagement.

The CAAP took our RMNCAH laws out of the shadows and turned them into bills of real interest in Parliament – a live agenda for saving mothers and babies, not just words on paper.

This was achieved by bringing everyone to the table: Government, Members of Parliament, civil society, health workers, and community members.”
